Lockout Tags

Greatly reduce the chance of an accident.

E-Z-Code®

Lockout tags meet current OSHA regulations and can prevent serious accidents from happening. When secured with nylon ties, lockout tags can withstand 80 lbs. of pulling pressure. They feature brass eyelets with an inner diameter of 7/16 in. — large to accommodate most locks. A write-on matte finish enables you to write on the tags with pens, pencils or permanent markers.

Cat. No.	Tag Size
