Self-Laminating Tags

Clear covers, clear info, clearly identifiable.

Self-laminating tags are great for listing information pertinent to you and your organization. You can seal and protect the information under a clear polyester cover that's weatherproof, moisture resistant and tamperproof. All tags have blank backs and include a 1/4 in. brass eyelet.

1. Lift the cover and add your information in pen, pencil or marker.

2. Peel the protective film off the clear polyester cover.

3. Press the clear polyester cover over the tag to provide a moisture resistant, tamperproof seal.

Pre-Printed Self-Laminating Tags
