Thermal Transfer Wire Marker Printer and Media**E-Z-Code®****EZL100-Kit**

The E-Z-Code® EZL100-Kit features the EZL-100 label printer with everything you need to make wire marking fast and simple. The EZL100-Kit features a rugged, hard-sided case, a printer, two label cassettes, a complete set of batteries, and an AC adapter. The EZL100-Kit gets quickly started and provides handy storage for your wire marking materials. If you already own the EZL-100 Printer, you may also purchase the hard-side case or any of the accessories separately. Contact your local T&B distributor about the EZL-100 Printer, kit, case and accessories. Don't forget to ask about the complete line of time-saving products offered by

Thomas & Betts.

Easy to Use and Won't Smear !

Great for Rough Surface Cables

High-Visibility Print

Simple, Accurate Wire Marking at the Touch of a Button.

- One-touch Hotkeys create labels instantly for wire wrapping, terminal blocks, device covers, patch panels, and labels in serie.
- Symbols for commonly used electrical and datacom applications including ohm, ground, phone, date and fax.
- Five print sizes including XS, S, M, L and XL.
- Horizontal and vertical print orientation.
- Memory to automatically recall last label and stores up to eight custom labels.
- Large display with 2-line x 15 character views (30 characters total). Quality Labels That Stick and Last.
- Flexible Nylon Material - excellent for wire and cable wrapping on curved, textured and highly textured surfaces.
- Permanent Polyester Material - good for general labeling on flat or textured surfaces.
- Prints on heavy duty 1/4", 3/8", 1/2" and 3/4" tapes.
- EZ-Peel Labels in an easy-to-load cassette.

Thermal Transfer Wire Marker Printer and Media**Heat Shrinkable Markers For EZL-100 and EZL-75 Printer**

Heat-shrinkable sleeves are now available for T&B's EZL-100 and EZL-75 Wire Marker Printer. Panel builders, maintenance electricians and other OEMs have the flexibility to print heat-shrink sleeves on the spot when they're needed. The sleeves can be shrunk onto the wire or cable using a heat gun without the need for sticky adhesives. The sleeves may also be aligned and held in place on the wire before shrinking. Since the sleeves are a continuous roll, installers may select different lengths using the same cassette.

- 1/4", 3/8", 1/2" and 3/4" sizes
- Available in bright yellow and white colors
- Clear, non-smudging lettering and chemical/solvent resistance
- Flame retardant, Polyolefin material, 3:1 shrink ratio offers extra protection and insulation to the wire or cable

Meets the performance requirements of MIL-DTL-23053/5 classes 1 and 3
